

Kisii Campus Primary,
P.O. Box 408,
Kisii - Kenya.

Dear Allies,

How are you? We think you are pushing and shoving on with life. For us the almighty father above is helping us push on with life.

The names of the conqueror girls group are; Gladys, Jane, Yvonne, Juliet, Anne, Halima, Maryanne, Harriet, Judy and Rosephellah.

Our hobbies are; learning, playing handball, volleyball and netball. Even though we learn many subjects in school, our best subject ~~is~~^{is} science because, it involves a lot of practicals which make it easy to understand.

We are happy because we are sailing in the same boat on the motion of fighting the epidemic disease - AIDS that is well known all over the world.

We are looking forward to hear from you soon and hope we will learn and share a lot from you.

Yours affectionate friend
Group conqueror - girls.

GROUP CONQUEROR MASCULINES

KISII CAMPUS PRIMARY SCHOOL,
P.O BOX 408-40200,
KISII, KENYA

Dear comrades,

How do you do? We hope you are doing fine as well as going on with the same motion as we are. We have learnt a lot since the first time we were told about the programme.

We as the masculines know that we both have some things in common such as we are both human beings. Although our skin colour is different from yours, we hope we will get on well with this programme without any ratio discrimination. Our group has got fourteen (14) masculines namely: Albert, Brian Oinga, Brian Ordieki, Bradley, Boniface, Derrick, Innocent, Kevin, Saul, Sydney, Vincent Ngote, Vincent Bonuke, Walter and Webstar. All these members are very grateful about the programme because it will help many of us spread the message about dangers and prevention of HIV/AIDS.

As group conqueror's masculines, we have many subjects that we like. Some of them include Mathematics, English and Sciences. These subjects are liked by many of us because they are the first to consider when applying for a job of your career. Most of us are willing to be engineers all over the world.

Our favourite games are football, Rugby, Handball, volleyball and athletics. These games help us a lot in our body. They keep us mentally fit and we practise regularly before participating in any event. Our hope is to keep the pride of our country high in everything we do.

Our hobbies are many but a few include fishing, swimming, story telling, reading magazines and newspapers, reading storybooks, singing, drawing and dancing. We usually have our hobbies during leisure time.

Most of us like different kinds of foods while others do not like different kinds of foods. Some of the foods we like include cabbages, kales, spider flower, oranges, lemons, passion fruits, citrus fruits, mangoes apples and many more. The cereals we like include rice, maize, wheat, millet. Our staple food is known as 'ugali' which is made from maize flour.

The drinks we like mostly are soda and different fruit juices. They help keep our body immunity high. These are some of the things we like as group conquerors masculines. We wish you could also write to us telling us what you like most.

For this few remarks, we wish that you could also tell us what you have learnt about the fatal diseases called 'HIV/AIDS'. We wish we could meet but it is because of unavoidable circumstances. We are very grateful to write to you.

Yours faithfully
Group conquerors masculines
